Message

I am happy to know that VOICE OF UNIVERSAL EDUCATION SOCIETY is going to publish a book "WINS PROGRAM – WASH IN SCHOOL". The Society through its cofounders Mr Anand and MS Urvashi are doing work for sanitation, cleanliness and waste management. As the saying goes "Healthy mind resides in the healthy body" so to keep the body healthy sanitation plays a great role. I hope that this book will prove to be beneficial to the children of primary schools.

I wish the society all the best in this noble cause.

SANITATION FOR ALL

This manual is very important and it is why I have done this application for all the teachers sharing thus my knowledge in schools on these subjects :

Microbes – Drinking water in urban – The fecal peril – The urban waste – Wash Body, Teeth and Hands.

You will find in this manual the objectives, the presentation of the teaching material and explication of the method.

In each lesson, there are questions and answers, drawings and play.

The practice of this rules are more important in the tribal areas more than in the big cities. During our visits in the little schools and balivaries in the District of Udaipur, we have constated the difficulties that the poor families have for education of their children.

I wish that this manual will contribute to a best comprehension of an environment where all children grow, learn play and share every day,giving them more safety, good health. It is very important for their future and for all India.

Ananda
